Day 4 Assignment

Key Inclusions:

- **Authentication Gateway:** A secure initial landing page featuring a **Login and Register** interface.
- **Credential Validation:** Integrated JavaScript logic to verify usernames and passwords, granting access to the portal only for **valid student accounts**.
- **Dynamic Monthly Chart:** A specialized "Monthly Activity Page" that uses **JavaScript Arrays** to store and display subject-specific tasks.
- **Subject Filtering:** An interactive **Dropdown (Select Box)** that allows students to filter their monthly activities by subject (Maths, English, Science, etc.).
- **Advanced Responsiveness:** A "Mobile-First" design built with **Bootstrap 5 and Flexbox**, ensuring the portal reframes itself for smartphones, tablets, and desktops.
- **Node.js Local Deployment:** The entire application is deployed via a **Node.js HTTP server**, simulating a real-world web hosting environment.

Note : Kindly go through the attached Zip File for the Code.
